Outstanding Gladiolus

EVERETT A. QUACKENBUSH

GREETINGS

To our many friends, old and new, we again extend our appreciation and thanks for the business you have given us, and we once more present for your consideration our list of Distinctive Glads. Your fine support, increasing through the years, has encouraged us to carry on in spite of handicaps incident to the war. "Evie", the junior member of the firm, who has had charge of production and of filling and shipping orders during recent years, has been with the Army Air Corps since early June. "Shorty", our working foreman for the past several years, who next to Evie, has had most of the responsibility for growing the fine bulbs which you have purchased from us, has been with the Army Quartermaster Corps since April. Fortunately Helen, the younger daughter of the family who finished her course in Landscape Architecture at State College last spring, was willing to take over for her brother and manage production. In spite of shortage of help and adverse weather conditions due to abnormal rainfall which made it difficult to control weeds and to later dig the bulbs, she has done a fine job. As a result, we are again able to offer you high quality bulbs of distinctive varieties which include the best of the old and the new.

VARIETIES

In our opinion, each variety listed in our catalog has merit and is worthy of your consideration. As to whether you will like a particular variety may depend on your personal preferences and the purpose for which you wish to use the flowers. Remember that the price is not an indication of the quality of the variety. Newer kinds must of necessity be higher in price because of scarcity of stock. We suggest that beginners start with tried and true varieties in order to avoid disappointment. Growers of more experience and fanciers will want to try the newer ones.

OUR GUARANTEE

All our stock is guaranteed to be healthy, vigorous, free from thrips, and true to name. **You must be satisfied.** If any stock is unsatisfactory, tell us and we will try to satisfy you. If you like our bulbs and our service, tell your friends.

PLEASE READ CAREFULLY

All quotations are subject to previous sale. We urge that you place your orders early so that you may not be disappointed. Each year we are unable to fill late orders for a number of varieties. Orders are segregated as soon as possible after being received but will not be shipped until after danger of freezing is past, unless you request otherwise. However, bulbs can be sent any time desired. No substitutions will be made without your permission. If we are out of a variety you order, your money will be refunded unless you give us permission to make a substitution in size or variety. Cultural directions will be included with all orders.

All orders from the retail list will be prepaid to points in the United States. Prices as indicated in the quantity list are not prepaid, but are F. O. B. New Cumberland, Pennsylvania. If you wish to order part from the retail list and part from the quantity list, we will send the order transportation collect and include extras or overcount to make up for the transportation on the retail items. A discount of 5% will be allowed on cash orders of \$2.00 to \$5.00. On cash orders of over \$5.00, a discount of 10% will be allowed. These discounts do not apply to mixtures nor to orders from the quantity price list. We also include worthwhile extras with retail orders. The value of the extras will be in proportion to the size of the order. Suggest varieties desired as extras. If we have sufficient stock, we will be glad to comply with your request. See special discount coupon on page 14.

Where a variety is listed at 2 for 10 cents or 2 for 12 cents, please do not order a smaller number at a lower price. Five bulbs will be sold at one-half the price of ten, but no single item will be accepted for less than 10 cents. Where no 10 price is indicated, it may be found by multiplying the price of a single bulb by 8. Twenty-five bulbs of the same size and variety will be sold at 2 times the price of 10. One hundred of the same size and variety will be sold at 8 times the price of 10.

Where bulblets are sold by the packet, 25 to 50 or more will be included in each packet. We will give good value.

Do not ask for special quotations unless you have a large order. Our prices are very low for the high quality bulbs offered. However, we are glad to furnish special quotations to jobbers, growers, and others purchasing in large quantities.

All bulbs listed as large size are 1¼ inches and up, mostly 1½ inches and up, in diameter. Medium size bulbs are ¾ to 1¼ inches in diameter. Small bulbs are ¼ to ¾ inches in diameter. For the finest blooms, large bulbs are best. Medium size bulbs of most varieties will give nice cut flowers, but the spikes are not as long as from large bulbs. Although small bulbs of many varieties will bloom, others will not. The blooms from small bulbs will be noticeably smaller in size. Bulblets seldom bloom and are often difficult or impossible to germinate. We do not recommend them except to experienced growers.

1943 INTRODUCTION

We announce with pleasure that Mr. L. P. Benedict has permitted us to assist in introducing his promising new variety MARION PEARL.

MARION PEARL (Benedict) (Pearl of California x Picardy). This large formal type gladiolus is light salmon in color shading to a lighter throat, without markings. It opens up to nine florets at a time on a 55 inch spike which does not crook and which carries from 18 to 21 buds. It has wide open, somewhat ruffled, 6 inch florets which stand heat well. Because of the size of the florets and the large number open it has great possibilities as a show flower. In addition, it is most promising as a commercial cut flower. Its only apparent fault is that the lower floret is sometimes misplaced. Granted N. E. G. S. Award of Merit 1942. No bulblets and only large bulbs sold the first year. Large bulbs \$1.00 each. 10 for \$8.00. (See cut on front cover).

PREVIOUS INTRODUCTIONS

FLORA FARMER (Quackenbush) A beautiful radiant, deep pure pink, with a creamy white throat. Opens 5 to 8 large, ruffled florets at a time. Nearly all of the buds show strong color by the time the first floret opens, which adds greatly to its value as a commercial cut flower. Placement and attachment of florets excellent. It is a strong healthy grower, making plenty of bulblets which germinate easily and make good growth. Introduced in 1939, it has already won numerous blue ribbons and will win many more as stock becomes more plentiful. During the past summer it was in great demand with florists. Since large bulbs often produce to or three spikes, all eyes but one should be cut out when growing for exhibition purposes. (85 days).

INTERMEZZO (Seedling 3513) (Minuet x Picardy) Clear cream without markings except that a faint dusting of violet rose, very deep, gives a warm tone to the throat. The florets, somewhat similar to those of Minuet, are wide open, pointed and reflexed. Opens 5 to 8 five inch florets. Has 18 to 20 buds on spike which never crooks. Placement and attachment are excellent. The type is informal. Intermezzo is strong and healthy and is a tall grower, 52 to 55 inches or more. It blooms from any size bulb and when cut, opens up well in water. Having excellent substance and great decorative value, we believe it will prove to be a fine commercial. On the show table it will do well in its class. It makes plenty of bulblets which germinate readily and grow strongly. As Seedling 3513, given Award of Merit, West Virginia Society trial garden 1940. Award of Merit, Empire State Society, 1941. Best seedling spike in the show, Pennsylvania Society Show, Johnstown, Pa., 1941. (90 days).

MOTHER KADEL (Kadel) (Picardy x Spray of Gold) Medium yellow, slightly deeper in color than Mary Damaris. Entirely clear self color without marking or the slightest bit of foreign color even in its deepest throat. Opens 5 to 7 florets with 5 additional buds showing color. It makes a tall spike which does not crook. Placement and attachment are excellent. When cut it opens up well and is a good keeper. It is the best commercial cut flower yellow that we have seen. We helped introduce this variety for Mr. Kadel in 1941. While this variety has made a great record as a show flower, it will make even greater achievements as a commercial cut

flower. Our faith in the variety is demonstrated by our having purchased jointly with Alfred Moses of Lima, N. Y., the entire stock of the variety. Award of Merit Maryland trial garden, 1942. (90 days).

PINK RADIANCE (Quackenbush) (Picardy x Minuet) Pure light pink without marking except a very inconspicuous touch of carmine deep in the throat. Six to eight wide open florets of good size on a tall spike which never crooks. The spike is graceful. Excellent placement and attachment. Sixteen to eighteen buds. It is a vigorous grower, producing plenty of bulblets which germinate well. Introduced in 1941. It will go far as a show flower. However, its greatest potential value is as a commercial cut flower. It makes nice spikes from any size bulb, and opens up well in water when cut. Award of Merit at West Virginia trial garden 1941 and by E. S. G. S. in 1942. The blooming period is 90 days.

GLADIOLUS DURING THE WAR

During the critical period through which we are passing it is even more necessary than in normal times that we have some source to which we can turn from time to time for relief from the nervous tension under which we live. A garden, perhaps better than any other thing, serves to furnish this needed mental and physical relaxation. Gladiolus, because of the ease with which they may be grown, their infinite varieties of form and color, their great beauty and their usefulness as cut flowers, make an ideal garden flower. Even though yours is a victory garden, intended principally for the production of food, its value can be greatly enhanced by including some gladiolus to add a touch of color to the garden and to furnish beautiful flowers for use in your own home and to share with your friends.

JOIN A GLADIOLUS SOCIETY

Persons interested in the growing of gladiolus, should join a society. The benefits and information received are worth much more than the dues. Some of the societies issue regular publications such as bulletins and year books. Others conduct trial gardens and issue reports on the varieties grown. They all conduct shows.
